

HIRING DRAFTSMAN

TENDERLIFT® is a company based in the nautical area of Canet-en-Roussillon, 15 minutes away from Perpignan (www.tenderlift.net). It designs and manufactures platforms for catamarans. In this niche segment, Tenderlift products are international references, equipping catamarans from major shipyards and private individuals worldwide.

Tenderlift is a rapidly expanding company with ambitious goals for innovation and "made in France" products.

The company currently employs 45 employees, including a 6-person design office that designs and develops all of our products.

Roles/Activities :

As part of our design office, you will create study files for our products, including all plans and bills of materials, developed using CAD software. This includes the following activities:

- Creation of industrial drawings
- Project setup and monitoring
- Feasibility studies
- Review and validation of documents before production

Profile (qualification, experience, required skills) :

- DUT/Bachelor's degree or equivalent
- Skills in industrial drawing and proficiency in CAD software
- Interest in the boating industry is a plus

Skills :

Professional Skills :

- Represent and dimension mechanical parts, objects, or assemblies
- Draw assemblies and sub-assemblies with associated bill of materials
- Determine and calculate functional, physical, dimensional, structural, or geometric constraints of parts
- Maintain the design file
- Study projects and preliminary designs
- Conduct feasibility studies

Behavioral Skills :

- Maintain vigilance over time
- Detect abnormal situations and inform others
- Adhere to production standards
- Work well independently or as part of a team
- Incorporate feedback and adapt professional behavior

Cross-functional Skills

- Adhere to quality standards
- Use Computer-Aided Manufacturing (CAM) software
- Use Computer-Aided Design (CAD) software

Location: Canet-en-Roussillon Contract

Type: Permanent contract (CDI)
